

Python to Generate Random Strong Passwords

```
import os, random, string
rnd = random.SystemRandom()
chars = string.ascii_letters + string.digits
#chars = string.ascii_letters + string.digits + '!@#$$%^&*()' # More strong
length = 8
#print ''.join(rnd.choice(chars) for i in range(length)) # Just One

for i in range(15):
    print i+1, '\t', ''.join(rnd.choice(chars) for i in range(length))
```
